

Principal's Message

Education is the most important learning in a man's life. An educated man is never a failure. Today's children are future of tomorrow. No two children are identical, even two faces are not identical even two faces are not identical. So we have to accept them the way they are and should be nurtured with love and care. Learning abilities are also different among different children. So they should not be pressurized and let them grow naturally DAV Public School, Purabsarai, Gaushala Road, Munger Just shower your love and affection and given them time.

Children are the best assets to any nations making the treasure even more valuable are the schools, the teachers, friends and its infrastructure. All put together make up the atmosphere in which the child is to be molded for future. Thus maximum is invested in children's needs; be it the laboratories, library, sports facilities, activities or any other. The students grooming at all levels goes hand in hand, with the knowledge imparted and building of the personalities. Not only are teachers highly qualified in their subjects but they are also well trained in shaping the children's attitude value and culture. Being a part of D.A.V tradition students are rooted to their tradition and culture of the east. They are also provided best in the system to be able to be at par with the west. No wonder in its early adulthood to the school has its students all over from the globe. They are the young ambassadors, showing the seed of our values and wisdom all over. So while waiting for the fresh blossom we happily prepare the future torch bearers who would carry forward this rich tradition. The great mission we undertake with the blessing of the aegis of DAV CMC and support of LMC. The venture becomes easy and enjoyable with the dedication of teachers hard-work of the staff and immense care of the esteemed parents.

With Best Wishes

(Sanjay Kumar)
